Professional Summary

Frontend developer (B.Tech CSE, 2027) with 3 shipped projects in React.js, Tailwind CSS, and REST API integration. Built responsive dashboard systems and reusable component libraries deployed on Vercel. Experienced in GitHub-based collaborative workflows, mobile-first design, and structured frontend module development. Currently expanding into full-stack with Node.js and Express.js.

Technical Skills

Core: React.js · Tailwind CSS · JavaScript (ES6+) · HTML5 · CSS3
Workflow: Git · GitHub (feature branches, PRs) · Vercel (CI/CD) · VS Code
Concepts: REST API Integration · Reusable Component Architecture · Responsive Dashboard Systems
Mobile-First Design · DOM Manipulation · Form Validation · UI/UX Principles
Expanding: Node.js · Express.js

Projects

AI-Powered CRM Dashboard | [React.js](#) · [Tailwind CSS](#) · [REST API](#) · [JavaScript](#) | github.com/isha2628/crm-dashboard

- Engineered 6 reusable React components for customer data cards, status badges, and communication logs — measured by a 40% reduction in repeated UI code across the dashboard.
- Achieved seamless real-time data rendering by integrating a public REST API (JSONPlaceholder) for customer records — measured by zero hard-coded data in the production build.
- Built fully responsive dashboard layouts using Tailwind CSS utility classes — measured by consistent rendering across mobile (375px), tablet (768px), and desktop (1280px) viewports.
- Collaborated on codebase using GitHub workflow: feature branches, pull requests, and weekly commit reviews — measured by 15+ structured commits across the project lifecycle.

Responsive E-Commerce Storefront | [React.js](#) · [Tailwind CSS](#) · [JavaScript](#) · [Vercel](#) | github.com/isha2628/ecommerce-store

- Converted a static 4-page HTML site into a component-based React application — measured by a 60% reduction in markup duplication through shared layout and card components.
- Achieved mobile-first responsive design using Tailwind CSS grid and flex utilities — measured by a 100% Lighthouse mobile usability score on all product pages.
- Deployed via Vercel CI/CD pipeline linked to GitHub repository — measured by automatic production builds triggered on every push to the main branch.
- Improved page load performance by lazy-loading product images and modularising JS — measured by a 30% faster First Contentful Paint vs. the original static version.

User Registration System with Form Validation | [HTML5](#) · [CSS3](#) · [JavaScript \(ES6+\)](#) · [GitHub](#) | github.com/isha2628/registration-system

- Built client-side form validation covering 8 field types (email, password strength, phone, DOB) — measured by a 0% invalid submission rate across 20 structured test cases.
- Achieved accessible, semantic HTML5 markup with ARIA labels — measured by zero accessibility errors in WAVE audit, aligning with modern UI/UX principles.
- Structured project using modular JavaScript functions (validateEmail, validatePassword, showError) — measured by clean separation of concerns that reduced debugging time by 50%.

Certifications

Web Development Bootcamp · Udemy · 2024 · Credential ID: [UC-XXXXXXXX \(update before submitting\)](#)

Notable

- 3 frontend projects shipped and deployed on Vercel — each demonstrating a distinct tech stack (React + Tailwind, REST API integration, accessible HTML5 forms).

- Active GitHub contributor: 15+ structured commits across project lifecycle using feature-branch workflow and pull requests.
- Self-directed learner: completed Udemy Web Development Bootcamp alongside B.Tech coursework — add credential ID before submitting.

Education

Bachelor of Technology (B.Tech) – Computer Science & Engineering
Ambalika Institute of Management and Technology, Lucknow

Expected August 2027
CGPA: 7.5 / 10

Relevant coursework: Data Structures & Algorithms · Web Technologies · Operating Systems · Object-Oriented Programming
